HVAC Services-

the design process

Brief from client & establishing a budget

Revised design

Review and feedback from a completed project

Preliminary design & material selection

Targeting design to match budget

Construction of a project

Our Projects

Since our foundation, our designers, project managers and architects have been passionately transforming spaces. We offer each of our clients a unique and innovative solution to their design needs.

TO K'OPERE ADVOCATES

The entrance at K'opere welcomes a bold yellow and royal blue signage that sits pretty against a dark ombre wooden background. From it you feel a powerful intimidating yet welcoming presence. The passage way is all glass and stands out, which is great for transparency as well as aesthetic.

WKN ADVOCATES

The warm and bright colors at WKN offer an interesting contrast of what one would assume should be a law firm. The reception is clad with a natural stone wall that magnificently reflects the daylight lighting fixtures that hang above the main desk.

PROGRESSIVE CREDIT

Nothing says prime luxury like the GM's office at Progressive Credit. The space is fitted with eclectic lighting which offers a unique contrast to the mahogany brown furniture. The office comes fully equipped with a meeting room, lounge and lavatory facility.

PACIFIC PETROLEUM

The brightly neon coloured lighting at Pacific Petroleum bring in a different almost retro vibe to the office that is unique and exquisitely pleasant.

E.K MUTUA ADVOCATES

From the warm white accents to the shiny gloss flooring, interiors at E.K Mutua bring great energy to the workspace.

MULONDO ADVOCATES

At Mulondo Company, one cannot help but feel a sense of warm daylight that instantaneously engulfs you, ironic, given that it is nowhere near any source of natural lighting. Our clients' brief was to incorporate natural stone cladding for the reception's accent wall.

FUSION CAPITAL

The ergonomic design keeps workers health and limitations in mind, looking to reduce their fatigue and frustration during their workday. The open space is rustic and bright exuding great energy as one walks in.

WESTLOAD CREDIT

This office takes its inspiration from old factories, barns, warehouses. It tends to have a natural color palette, with a mix of brown, rustic, and blue colors, which give the place a feeling of having more space available.

Why work with us?

We provide both architectural consultancy concepts to actual implementation of work at site.

We are certified with NCA (National Construction Authority)
